

Phil Slade

I have worked as a professional engineer in the electronics business for over 30 years and I'm currently employed as a Project Manager / Engineering Manager by the company Selex ES, based in Luton, which was better known by its previous names, BAE Systems and before that Marconi. I am a Member of the Institution of Engineering & Technology (IET), the professional society for the electrical & electronic engineering community. Over the last 2 years I have taken on a supplementary role at Selex working with local schools in an attempt to promote more knowledge and interest in engineering. One of these schools where I have responsibilities for this work is Cavendish. I have arranged several STEM (Science, Technology, Engineering & Mathematics) days and I'm supporting a range of engineering projects including the Rampaging Chariot competition.

I am married, with 2 teenage daughters who attend Kings Langley School and I live locally in Bedmond, near Abbots Langley. My interests are plenty, but in particular I'd mention cycling, DIY and classic cars.
